

A heavy duty single pitch lean-to structure with 6metre spans between posts

## The Canterbury Range

- The **Canterbury Range** consists of three very different looking structures designed to compliment any surroundings, whether contemporary or traditional.
- Made completely from **aluminium** all Canterbury structures span 6metres from post to post with a projection up to 6metres and can be fitted with either 8mm toughened glass or 35mm structured polycarbonate sheets. The glass option offers improved acoustic properties reducing noise from rain during a downpour as well as providing a sparkling finish which is easy to maintain.
- Each system can be manufactured to an exact size to suit individual requirements and can be powder coated to any RAL or BS colour. The structures feature easy-fix clip-on profiles that hide fixings and downpipes to give a stylish and modern look with cabling for LED lighting, IR heaters or sound systems hidden from view.
- The Canterbury range includes:  
The *Contemporary* with its clean minimal look  
The *Lifestyle* with its rounded face & soft finish and  
The *Traditional* with its ornate gutters, and clip-on cladding
- With a minimum lifespan of **25 years** all Canterbury structures come with a ten year warranty.

## Canterbury *Contemporary*

Introducing the *Canterbury Contemporary*, with clean lines and minimal looking aluminium extrusions which have been designed with simplicity in mind. This sleek, yet modern structure has a subtle elegance that will never go out of style.

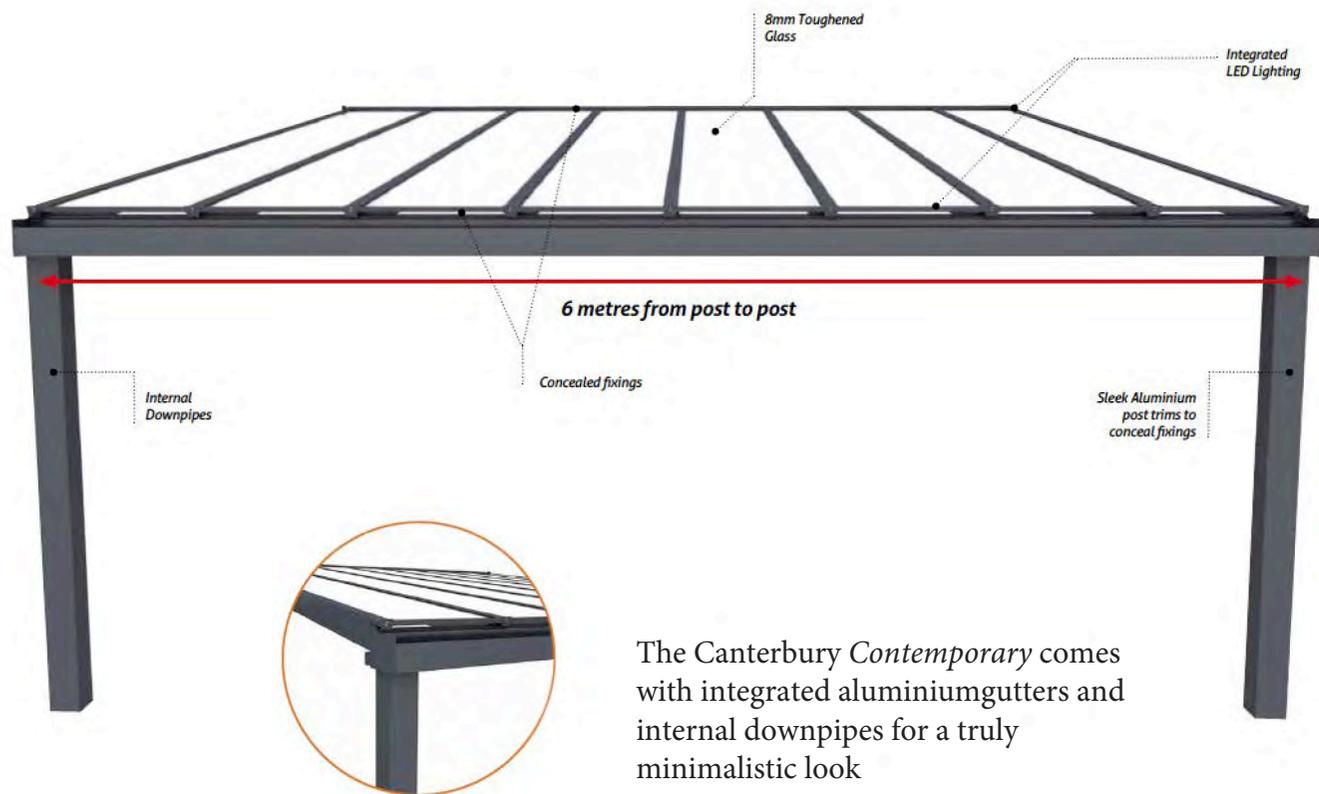

- The optional integrated LED Lighting and heaters enable your customers to use the structure into the evening, and for complete shelter from the elements they can opt for the glass room upgrade.
- The fixings are hidden with aluminium trims and the downpipes are inside of the posts and can be connected either underground drainage or diverted to a surface drain.
