

A tensile fabric square coned umbrella with a tubular steel column

Goodwood

- Wide range of fabric colours available
- Accessories include lighting & IR heating
- Custom designs include rectangular and multi-coned styles
- Warranted for ten years under tension
- ArcCan installation teams operate Worldwide

Often specified for schools, home and garden, restaurants, and hotels, this permanent umbrella has an exceptionally strong tubular steel column with four horizontal radiating spars secured with tubular steel struts. The canopy is a patterned tensile fabric cone with four graceful scalloped edges. Fully engineered to withstand the worst weather imaginable, the Goodwood is one of our most popular models.

Specifications

Goodwood

A tensile fabric square coned umbrella with a tubular steel column

Framework

Heavyweight grade tubular steel column with radiating CHS spars and struts, all zinc and powder coated to RAL colour of choice, fixings either A2/A4 stainless or galvanised steel.

Fabric

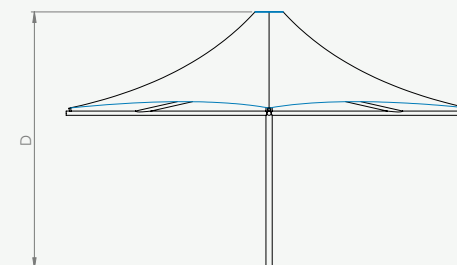

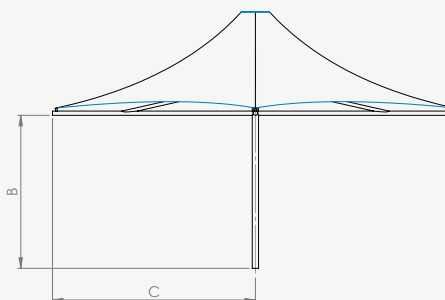

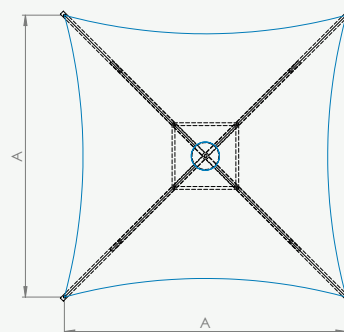

Architectural PVC coated polyester fabric, patterned and welded to form a shaped cone with H/D boundary webbing tensioned with a central S/S threaded push-up.

Foundations

We provide loading figures for your engineer to design foundations to suit local ground conditions. Typical details available on request.

Files

3D CAD models are available on request.

CODE	GOO35	GOO40	GOO50	GOO60
