

A cost-effective single pitch lean-to structure system

The Lewes Range

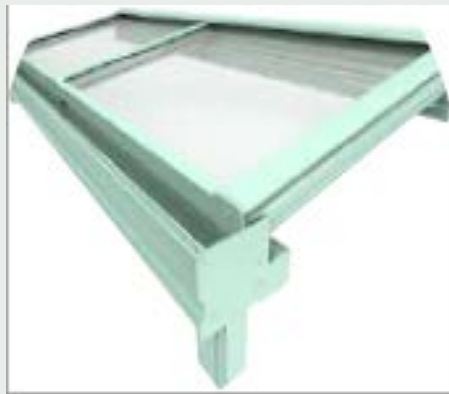

- The Lewes Range of shelter solutions has been designed with quality, longevity and speed of installation in mind.
- Made completely from aluminium all Lewes structures can be glazed with either toughened glass or polycarbonate sheets so they can meet most budgets. The glass option offers improved acoustic properties reducing noise from rain during a downpour as well as providing a sparkling finish which is easy to maintain.
- With a minimum lifespan of 25 years all Lewes structures come with a ten year warranty.

Four Options to choose from, with four upgrades available

A versatile single pitch lean-to structure with aluminium frame & 16mm polycarbonate roof

Lewes *Sixteen*

A Durable & Attractive Shelter Solution

Due to its clever design the Lewes *Sixteen* provides a durable shelter at a cost-effective price with a projection up to 4 metres (subject to technical load calculations) and has a lightweight roofing system.

- **Made from Aluminium** for durability and low maintenance the Lewes *Sixteen* can extend to any length with a projection up to 4 metres with variable pitch from 2.5 to 22.5 deg.,
- **16mm Structured polycarbonate** sheets in either clear or opal provide 98% protection from harmful UV.
- **Supplied as Standard** in white, any RAL colour is also available.
- **Modern, Stylish Appearance** the structure benefits from robust integral aluminium guttering which creates an attractive finish to the structure
- **Life Expectancy** of up to 25 years. This durable structure is supplied with a full 10 year guarantee.

Features & Benefits

Structured Polycarbonate 16mm thick

Available in either clear or opal the triple walled sheets provide high impact strength.

High UV Protection

During the manufacture of the polycarbonate panels, a layer of UV absorber is co-extruded on to the outer surface which prevents damaging UV radiation from penetrating the sheet. This process also prevents yellowing and loss of strength giving it a longer life.

Low Profile

The *Lewes Sixteen* can be fitted in areas where height is restricted

Simple Fixing System

Minimal parts required for quick and easy assembly

Stainless Steel Fixings

All the fixings are in S316 marine grade stainless steel for longevity and total resistance to corrosion.

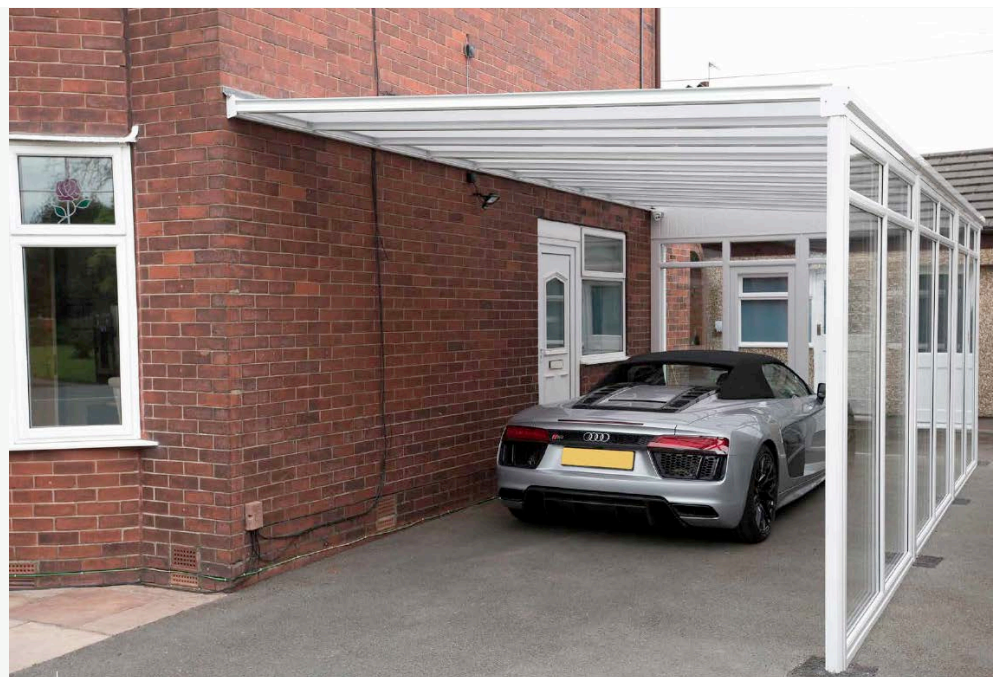

Integral Aluminium Guttering

Creates a sleek and modern design which is stronger than external guttering systems and saves time on installation.

Warranties

The *Lewes Sixteen* has a 25 year life expectancy and is guaranteed for ten years.

Lewes Sixteen

Additional Upgrades

You can enhance the use of the *Lewes Sixteen* by adding heating, lighting and sound, permitting all-year-round use. LED systems can provide mood lighting after dark and infrared heaters with ratings from 1.0kW to 3.0kW ensure that you never get cold. To complete the comfortable ambiance, *Relax Sound* speakers can be fitted with easy-connect Bluetooth.

A versatile single pitch lean-to structure with aluminium frame & 35mm polycarbonate roof

Lewes *Thirtyfive*

A large Domestic or Commercial Solution.

Perfect for schools, colleges, hospitals and local Authority establishments or large span carports and verandas due to its durability, versatility, and unlimited length.

- Made from Aluminium for durability and low maintenance the Lewes *Thirtyfive* can extend to any length with a projection up to 6 metres with variable pitch from 2.5 to 45 deg.,
- 35mm Structured polycarbonate sheets in either clear or opal provide 98% protection from harmful UV.
- Supplied as Standard in white, any RAL colour is also available.
- Modern, Stylish Appearance the structure benefits from robust integral aluminium guttering which creates an attractive finish to the structure
- Life Expectancy of up to 25 years. This robust system is supplied with a full 10 year guarantee.

Lewes *Thirtyfive*

Features & Benefits

Structured Polycarbonate 35mm thick with block edge

This feature offers a hard edge on both sides of the panel which provides a much stronger roof system for improved snow load.

High UV Protection

During the manufacture of the polycarbonate panels, a layer of UV absorber is co-extruded on to the outer surface which prevents damaging UV radiation from penetrating the sheet. This process also prevents yellowing and loss of strength giving it a longer life.

Robust Roof Panels

The roof system is strong enough to walk on as a means of escape or maintenance with the use of boards

Stainless Steel Fixings

All the fixings are in S316 marine grade stainless steel for longevity and total resistance to corrosion.

Integral Aluminium Guttering

Creates a sleek and modern design which is stronger than external guttering systems and saves time on installation.

Fire Performance

Our polycarbonate roof systems benefit from excellent fire performance meeting BS476 part 7 class 1 and EN 13501 B-S1 SO fire ratings.

Additional Upgrades

You can enhance the use of the Lewes *Thirtyfive* by adding heating, lighting and sound, permitting all-year-round use. LED systems can provide mood lighting after dark and infrared heaters with ratings from 1.0kW to 3.0kW ensure that you never get cold. To complete the comfortable ambiance, Relax Sound speakers can be fitted with easy-connect Bluetooth.

Warranties

The Lewes *Thirtyfive* has a 25 year life expectancy and is guaranteed for ten years.
